KATA PENGANTAR (Foreword)

Assalamu'alaikum Warahmatullahi Wabarakatuh

Puji syukur ke hadirat Allah SWT atas segala rahmat dan karunia-Nya sehingga Buku Profil Direktorat Pangkalan Data, Jaminan Mutu, dan Akreditasi ini dapat disusun dan diterbitkan dengan baik. Buku ini merupakan salah satu bentuk dokumentasi sekaligus media informasi yang menggambarkan peran, fungsi, program kerja, serta capaian Direktorat PDJAMA dalam mendukung penyelenggaraan pendidikan tinggi yang bermutu, akuntabel, dan berkelanjutan.

All praise and gratitude be to Allah SWT for His abundant blessings and grace, which have enabled the successful compilation and publication of this Profile Book of the Directorate of Higher Education Database, Quality Assurance, and Accreditation (PDJAMA). This publication serves as both a documentation of achievements and an informative resource that highlights the roles, functions, work programs, and accomplishments of the PDJAMA Directorate in supporting the delivery of high-quality, accountable, and sustainable higher education.

Sebagai unit yang mengemban tanggung jawab dalam pengelolaan sistem penjaminan mutu, pengelolaan pangkalan data perguruan tinggi, serta fasilitasi dan pengembangan akreditasi, Direktorat PDJAMA memiliki peran strategis dalam memastikan terlaksananya tata kelola perguruan tinggi yang efektif dan berorientasi pada peningkatan kualitas secara berkelanjutan. Ketiga bidang tersebut saling terintegrasi dalam membangun budaya mutu yang kuat, didukung oleh data yang valid dan akurat, serta dibuktikan melalui pencapaian akreditasi yang unggul.

As the unit entrusted with the management of the quality assurance system, higher education databases, and the facilitation and advancement of accreditation, the PDJAMA Directorate plays a strategic role in ensuring effective institutional governance and fostering continuous quality improvement. These three areas are closely integrated in building a strong quality culture, supported by valid and accurate data, and demonstrated through outstanding accreditation achievements.

Pangkalan Data Perguruan Tinggi menjadi fondasi penting dalam penyediaan informasi yang terpercaya untuk pengambilan keputusan, pelaporan, dan evaluasi kinerja institusi. Sementara itu, sistem penjaminan mutu berfungsi sebagai instrumen utama dalam menjaga dan meningkatkan kualitas pelaksanaan Tridharma Perguruan Tinggi. Di sisi lain, akreditasi merupakan bentuk pengakuan eksternal atas mutu yang telah dibangun dan dipertahankan oleh seluruh sivitas akademika.

The Higher Education Database serves as a vital foundation for providing reliable information to support decision-making, reporting, and institutional performance evaluation. Meanwhile, the quality assurance system functions as the primary instrument for maintaining and enhancing the quality of the implementation of the Three Pillars of Higher Education (Tridharma Perguruan Tinggi). Accreditation, on the other hand, represents external recognition of the quality standards that have been established and consistently upheld by the entire academic community.

Melalui buku profil ini, kami berharap para pemangku kepentingan dapat memperoleh gambaran yang komprehensif mengenai struktur organisasi, tugas dan fungsi, inovasi, program unggulan, serta berbagai capaian yang telah diraih. Buku ini juga diharapkan dapat menjadi sarana refleksi dan motivasi untuk terus memperkuat komitmen terhadap budaya mutu dalam setiap aspek penyelenggaraan pendidikan tinggi.

Through this profile book, we hope that stakeholders will gain a comprehensive understanding of the Directorate's organizational structure, duties and functions, innovations, flagship programs, and

various achievements. We also expect this publication to serve as a source of reflection and motivation, encouraging the continuous strengthening of commitment to a culture of quality in every aspect of higher education administration and development.

Kami menyampaikan apresiasi dan terima kasih kepada pimpinan universitas, seluruh unit kerja, program studi, dosen, tenaga kependidikan, mahasiswa, serta seluruh pihak yang telah berkontribusi dalam pengembangan sistem penjaminan mutu, pengelolaan data, dan pencapaian akreditasi. Sinergi dan kolaborasi yang terjalin selama ini merupakan modal utama dalam mewujudkan institusi yang unggul, berdaya saing, dan berkelanjutan.

We would like to express our sincere appreciation and gratitude to the University leadership, all administrative and academic units, study programs, faculty members, educational staff, students, and all parties who have contributed to the development of quality assurance systems, data management, and accreditation achievements. The synergy and collaboration that have been fostered over the years constitute a valuable foundation for realizing an institution that is excellent, competitive, and sustainable.

The data demonstrates a consistent and progressive transformation in quality, advancing from accreditation ratings of B, A, and Very Good toward the highest distinction of Excellent and internationally recognized standards.

3. PANGKALAN DATA PERGURUAN TINGGI (PDPT) (Higher Education Database)

Pangkalan Data Pendidikan Tinggi adalah kumpulan data penyelenggaraan pendidikan tinggi yang terintegrasi secara nasional sebagaimana dimaksud dalam Permendikbudristek Nomor 53 Tahun 2023 Pasal 1 Angka 9 sedangkan Pangkalan Data Universitas adalah sistem informasi terintegrasi yang mengelola seluruh data akademik, non-akademik, dan kelembagaan perguruan tinggi sebagai bagian dari ekosistem data nasional.

Higher Education Database is a nationally integrated collection of higher education administration data as stipulated in Article 1, Point 9 of the Minister of Education, Culture, Research, and Technology Regulation No. 53 of 2023. Meanwhile, the University Database is an integrated information system that manages all academic, non-academic, and institutional data of a higher education institution as part of the national data ecosystem.

Kebijakan Tata Kelola Data Universitas (University Data Governance Policy)

Kebijakan Tata Kelola Pangkalan Data Universitas bertujuan untuk:

The University Data Governance Policy aims to:

1. Menjamin ketersediaan data yang akurat, lengkap, dan mutakhir sebagai dasar pengambilan keputusan dan penjaminan mutu;
Ensure the availability of accurate, complete, and up-to-date data as a foundation for decision-making and quality assurance processes;
2. Mendukung pelaksanaan Sistem Penjaminan Mutu Internal (SPMI) dan Sistem Penjaminan Mutu Eksternal (SPME) perguruan tinggi;
Support the implementation of the Internal Quality Assurance System (IQAS) and the External Quality Assurance System (EQAS) within the higher education institution;
3. Memastikan kesesuaian data perguruan tinggi dengan Pangkalan Data Pendidikan Tinggi (PD Dikti) secara nasional;
Ensure the consistency and alignment of university data with the national Higher Education Database (PD-Dikti);
4. Mendukung proses akreditasi institusi dan program studi oleh BAN-PT dan Lembaga Akreditasi Mandiri (LAM);
Support institutional and study program accreditation processes conducted by the National Accreditation Board for Higher Education (BAN-PT) and Independent Accreditation Agencies (LAMs);
5. Melindungi integritas, kerahasiaan, dan keamanan data perguruan tinggi;
Protect the integrity, confidentiality, and security of university data;
6. Memenuhi kewajiban pelaporan data kepada Kementerian dan pemangku kepentingan terkait.
Fulfill data reporting obligations to the Ministry and other relevant stakeholders.

Peran Pangkalan Data dalam Tata Kelola Perguruan Tinggi (The Role of Data Management in Higher Education Governance)

Pangkalan Data Pendidikan Tinggi (PD Dikti) merupakan tulang punggung tata kelola perguruan tinggi modern yang menghubungkan akuntabilitas, penjaminan mutu, dan pengambilan keputusan strategis. Perguruan tinggi yang tidak melaporkan data ke PD Dikti secara tepat waktu dan akurat akan menghadapi risiko serius: program studi bisa dianggap tidak aktif, lulusan tidak diakui, dan ijazah tidak terverifikasi secara nasional. Dengan demikian, pangkalan data bukan hanya alat administratif tapi juga sebagai bukti keberadaan dan legalitas operasional institusi di mata negara.

The Higher Education Database (PD-Dikti) serves as the backbone of modern higher education governance, linking accountability, quality assurance, and strategic decision-making. Higher education institutions that fail to report data to PD-Dikti accurately and in a timely manner face significant risks: study programs may be classified as inactive, graduates may not be officially recognized, and academic qualifications may not be verifiable at the national level. Therefore, the higher education database is not merely an administrative tool but also serves as evidence of an institution's existence, legitimacy, and operational compliance within the national higher education system.

Keterkaitan PDPT Dan SPMI (The Connection Between Quality Assurance And The Higher Education Database)

Gambar 9. Keterkaitan SPMI dan PDPT

Pictures 9. The Conection Between Quality Assurance and the Higher Education Database

Universitas YARSI mengintegrasikan Sistem Penjaminan Mutu Internal (SPMI) dengan data PDPT pada setiap tahapan PPEPP, dari tahapan penetapan hingga peningkatan standar dilakukan dengan berbasis data yang valid dan terverifikasi.
