SDG 11 CONSOLIDATED REPORT

THE Impact Rankings 2027 | Reporting Year 2026

Public Access, Cultural Heritage, Sustainable Mobility and Urban Development

17	IDR 124.04 bn	IDR 1.04 bn
Portal indicators mapped	University expenditure	Arts and heritage expenditure

SDG 11 OVERVIEW

Executive Summary

Universitas YARSI contributes to SDG 11 through public access to cultural and educational facilities, support for arts and living heritage, and measures that facilitate walking, shared transport, remote work and responsible land use. The 2026 reporting evidence includes activities at Masjid Jami YARSI, public visits to the library and campus, community green-space revitalisation in Tangerang, and the university's documented pedestrian infrastructure.

The WUR portal distinguishes 2027 submission selections from the preceding 2026 column. This report reproduces the 2027 figures and responses without converting narrative activities into unsupported quantitative outcomes. Historical documentation from 2022 and 2025 is labelled accordingly. Particular evidence limitations concern the counted number of public performances, sustainable commuting targets, the continuity of employee remote-work provisions, documented local-authority cooperation and building-standard implementation.

THE Portal Metrics – SDG 11.3

Indicator	2027 submission	2026 comparison
11.3.1 University expenditure	IDR 124,041,437,622	IDR 358,687,550,947
11.3.2 University expenditure on arts and heritage	IDR 1,043,793,590	IDR 1,043,793,590

Indicator Coverage and Evidence Inventory

Section	Coverage	Supporting PDF evidence
11.2 Support of arts and heritage	11.2.1–11.2.6	6 indicator reports
11.3 Expenditure on arts and heritage	11.3.1–11.3.2	WUR Portal SDG 11
11.4 Sustainable practices	11.4.1–11.4.9	7 indicator reports + portal for 11.4.4 and 11.4.5

Source precedence: WUR Portal SDG 11 (capture dated 2 November 2026) governs 2027 responses and financial values. Individual indicator evidence PDFs govern dates, institutional statements, photographs and source references. Inconsistencies are explicitly qualified rather than silently reconciled.

11.2 Support of arts and heritage

11.2.1 — Public Access to Buildings, Monuments and Natural Heritage Landscapes of Cultural Significance

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Free access to all significant buildings (selected in portal)

Evidence Statement

Universitas YARSI documents public access to several culturally or institutionally significant campus spaces, especially Masjid Jami YARSI, the campus green space, displays honouring YARSI founders, and a history gallery. The institution-provided 11.2.1 report describes their cultural values and access arrangements, supported by photographs. During 2026, university reporting confirms community-facing Ramadan activities at Masjid Jami YARSI and organised external visits to university facilities, including the KPSI VI conference and Open House. Together these show existing access facilities and actual engagement during the reporting year.

Implementation and Supporting Evidence

Evidence 1 — Institutional inventory of publicly accessible cultural spaces (primary)

The YARSI Mosque as a place of worship and spiritual education featuring Islamic architecture and open daily; the campus park as an open space accessible from 06:00 to 18:00; the founders' monument, which is stated to be accessible to the public; and the history gallery, which can be visited during Open Campus events.

Evidence 2 — Public and religious use of Masjid Jami YARSI in 2026

A 2026 Universitas YARSI news report details the Masjid Jami YARSI Ramadan programme, including communal meals for worshippers and travellers, Qur'an education, religious talks, prayers, charitable distributions and a free homecoming initiative. The article notes most planned activities were implemented, except the MTQ. It corroborates active cultural and community use of the mosque in the reporting year and strengthens the internal evidence on public access.

Source: Universitas YARSI, "Madura Tujuan Akhir Mudik Yarsi 2026..." https://www.yarsi.ac.id/madura-tujuan-akhir-mudik-yarsi-2026-terima-kasih-bank-bri-bsi-juk-e-solutions-dan-goto

Evidence 3 — External use of campus meeting space during KPSI VI (complementary)

The university hosted the national KPSI VI and Kongres 2026 on 17–19 September 2026, attended by more than 80 participants from schools around Indonesia. Proceedings at the Al Qudus Room, 12th floor, demonstrate that external attendees used campus buildings for education and networking.

Source: YARSI Library, published 19 September 2026: https://lib.yarsi.ac.id/berita/universitas-yarsi-menjadi-tuan-rumah-kpsi-vi-dan-kongres-2026/

Evidence 4 — Open House external visits (complementary)

An official YARSI Library report dated 13 January 2026 records an Open House with around 30 participants from Greater Jakarta and parents/guardians. Visitors toured campus facilities including the library.

Source: YARSI Library, 13 January 2026: https://lib.yarsi.ac.id/berita/open-house-universitas-yarsi-puluhan-peserta-jelajahi-fasilitas-perpustakaan/

Documentary evidence 1 — source: Indicator 11.2.1, PDF p. 2.

Documentary evidence 2 — source: Indicator 11.2.1, PDF p. 2.

Documentary evidence 3 — source: Indicator 11.2.1, PDF p. 3.

Documentary evidence 4 — source: Indicator 11.2.1, PDF p. 3.

Documentary evidence 5 — source: Indicator 11.2.1, PDF p. 3.

11.2.2 — Public Access to Libraries, Books and Publications

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Automatic free access (selected in portal)

Evidence Statement

Universitas YARSI demonstrates public access to its university library through documented visits by external audiences in 2026 and through publicly available discovery and information channels. During the September 2026 Indonesian School Library Conference (KPSI VI), the library welcomed and assisted external school-library participants and introduced its facilities, collections, services and technology. During the January 2026 University Open House, prospective students and accompanying family members also visited the library. Its official website presents a catalogue, repository, collections, registration and electronic-resource information.

Implementation and Supporting Evidence

Evidence 1 — Guided public library access for KPSI VI participants (primary, 2026)

The official university library news item dated 19 September 2026 describes the reception and assistance of participants in the Indonesian School Library Conference VI and Congress, held on 17–19 September 2026 at Universitas YARSI. The event involved more than 80 attendees from schools throughout Indonesia; the library hosted a guided visit for participants. Librarians explained the library's facilities, collections, information services and use of technology, and exchanged professional practices with school librarians. This is direct evidence that external community groups could physically enter and use the library for educational access. The more-than-80 figure refers to event attendance and should not be presented as a verified separate headcount of library visitors.

Source: YARSI Library, "Perpustakaan Universitas YARSI Wujudkan Pengabdian kepada Masyarakat melalui Pendampingan Peserta KPSI VI" (19 September 2026). https://lib.yarsi.ac.id/berita/perpustakaan-universitas-yarsi-wujudkan-pengabdian-kepada-masyarakat-melalui-pendampingan-peserta-kpsi-vi/

Evidence 2 — Public library visit during YARSI Open House (primary, 2026)

On 13 January 2026, approximately 30 participants from Greater Jakarta, including prospective students and parents/guardians, joined the Universitas YARSI Open House. The visiting group toured the library, where staff introduced the discussion rooms, learning spaces and digital connectivity available to the university community. The activity demonstrates institutionally organised physical access for non-YARSI visitors and supports the conclusion that library access is available in certain circumstances.

Source: YARSI Library, "Open House Universitas YARSI: Puluhan Peserta Jelajahi Fasilitas Perpustakaan" (13 January 2026). https://lib.yarsi.ac.id/berita/open-house-universitas-yarsi-puluhan-peserta-jelajahi-fasilitas-perpustakaan/

Evidence 3 — Official library information, collections and repository portal

(complementary)

The official Universitas YARSI Library website provides a public-facing institutional information channel, showing service information and links for printed/electronic collection discovery, registration, repository and electronic resources. This confirms an accessible discovery infrastructure for academic publications and library services.

Source: Universitas YARSI Library, official website (accessed 24 October 2026). https://lib.yarsi.ac.id/

The PDF supplies textual source references but no extractable photographic evidence.

11.2.3 — Public Access to Museums, Galleries, Exhibition Spaces and Works of Art

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Free access to all museums and galleries (selected in portal)

Evidence Statement

Universitas YARSI has documented an art exhibition space featuring paintings displayed during YARSI Scientific Meeting and Exhibition (YASMINE) 2025 and an anatomy collection used for educational visits. The university-provided SDG 11.2.1 institutional report includes photographs of both facilities and describes a public open-house context for the anatomy collection. In 2026, the university also reported a student technology-innovation exhibition, showing continued capacity to present works to audiences.

Implementation and Supporting Evidence

Evidence 1 — Art exhibition gallery at YASMINE 2025 (institutional, historical)

The institutional SDG 11.2.1 report shows a corridor gallery lined with displayed paintings

and identifies the activity as the Faculty of Dentistry's YASMINE 2025. The photograph

substantiates the existence of a university-hosted venue for exhibiting works of art. The

accompanying institutional account indicates visitors could view displays in the context of university events. As this image concerns 2025, evidence of a 2026 exhibition or continuous

gallery access remains necessary for the reporting year.

Source: Universitas YARSI, institutional "11.2.1.pdf", pp. 3–4; Faculty of Dentistry YARSI,

YASMINE 2025 event listing: https://yarsi.ac.id/fkg/

campus exhibition space.

Universitas YARSI (historical evidence).

Evidence 2 — YARSI anatomy collection and educational visits (institutional)

The institutional report includes a photograph of an anatomy collection featuring preserved

anatomical specimens and visitors receiving an explanation. This is direct visual evidence of a

university collection of educational artefacts and an organized visiting activity, which may

support the museum/artefact component. However, the photograph is not dated to 2026 and

does not establish regular public admission or its pricing. The official medical faculty website

independently lists an Anatomy Laboratory among its facilities, but this should not be equated

automatically with a publicly accessible museum.

Source: Universitas YARSI, institutional "11.2.1.pdf", p. 4; Faculty of Medicine facility

profile: https://www.yarsi.ac.id/akademik/fakultas-kedokteran/kedokteran

specimens. Figure 4. Preserved Anatomy Specimens at YARSI — organ-system specimens displayed for

educational purposes. Figure 5. Additional Anatomical Specimens — selected preparations from the university's

teaching collection.

Evidence 3 — Student technology-innovation exhibition in 2026 (complementary)

An official university post dated 30 January 2026 describes an exhibition of Informatics

Engineering students' work, featuring technological innovations. This reinforces the

university's practice of organizing exhibition spaces for creative or research outputs in the

reporting year.

Source: Universitas YARSI, January 2026 news archive, “YARSI University Informatics Engineering Student Exhibition Showcases Various Technology Innovations”, 30 January 2026: https://www.yarsi.ac.id/2026/01

Evidence 4 — Participation in National Film Day 2026 (context only; not qualifying primary evidence)

YARSI students participated in an external film screening and discussion for National Film Day 2026. While this demonstrates artistic and cultural engagement.

Source: Universitas YARSI, “Mahasiswa Universitas Yarsi Turut Meramaikan Peringatan Hari Film Nasional 2026”: https://www.yarsi.ac.id/mahasiswa-universitas-yarsi-turut-meramaikan-peringatan-hari-film-nasional-2026.htm

Documentary evidence 1 — source: Indicator 11.2.3, PDF p. 2.

Documentary evidence 2 — source: Indicator 11.2.3, PDF p. 2.

Documentary evidence 3 — source: Indicator 11.2.3, PDF p. 3.

Documentary evidence 4 — source: Indicator 11.2.3, PDF p. 4.

Documentary evidence 5 — source: Indicator 11.2.3, PDF p. 5.

11.2.4 — Free Public Access to Open Spaces and Green Spaces

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Permanent free access to all campus grounds (selected in portal)

Evidence Statement

Universitas YARSI maintains landscaped outdoor and vegetated campus areas, including pedestrian and communal spaces. Its institution-provided SDG 11.2.1 inventory identifies the campus park as open daily from 06:00 to 18:00 and depicts the space in a supporting photograph. The university's published sustainability information provides further context on on-campus vegetation. A January 2026 Open House confirms organised visits by external audiences.

Implementation and Supporting Evidence

Evidence 1 — Institutional inventory of accessible campus green space (primary)

YARSI Campus Park as a green open space, describes its role in environmental conservation, recreation and social interaction, and reports daily public access between 06:00 and 18:00. Its photograph shows trees, planted borders and a pedestrian/communal area occupied by visitors. This is the most direct institution-provided support for public access to green space. Figure 1. YARSI Campus Green Space — landscaped walkway and communal area

Evidence 2 — Institutional sustainability information on campus vegetation

(complementary)

The university sustainability webpage discusses landscaped spaces and vegetation. The pre-existing indicator report cites approximately 14,000 m² of campus land and approximately 1,000 m² of vegetation as historical figures. These figures should not be presented as fresh measurements in 2026 without a dated land-cover survey. The webpage contextualises green-campus management.

Source: Universitas YARSI, SDGs institutional webpage. https://www.yarsi.ac.id/sdgs-yarsi/clean-water-sanitation-23

Evidence 3 — January 2026 Open House and external visits (complementary)

On 13 January 2026, the YARSI Library reported that approximately 30 participants from Greater Jakarta, together with parents or guardians, joined an Open House and visited university facilities. This demonstrates that the campus can welcome organised external

Source: YARSI Library, 13 January 2026. https://lib.yarsi.ac.id/berita/open-house-universitas-yarsi-puluhan-peserta-jelajahi-fasilitas-perpustakaan/

Documentary evidence 1 — source: Indicator 11.2.4, PDF p. 2.

11.2.5 — University Contributions to Local Arts through Annual Public Performances

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	More than 15 performances (selected in portal; independent count unverified in attached evidence)

Evidence Statement

Universitas YARSI supports student performing arts through SMAKA, an organised student activity unit covering traditional dance, percussion, band, choir and cinematography. The institution-provided 11.2.5.pdf adds visual documentation of traditional dance, identifies structured rehearsal schedules and facilities, and states that lecturers and professional trainers supervise the groups. IMASI, a separate pencak silat student organisation, illustrates complementary Indonesian cultural practice. The 2026 NGASO report records preparations for a proposed student performance (PENTAS) during the university's 59th anniversary. Together, these sources demonstrate institutional capacity for arts and cultural expression; however, the number of university-group performances actually delivered to public audiences in 2026 is not established by rehearsals, photographs or planning alone.

Implementation and Supporting Evidence

Evidence 1 — SMAKA student arts organisation, training arrangements and visual

documentation

SMAKA is a university student organisation that focuses on traditional dance, choir,

cinematography, and percussion, with band activities also listed. The document describes regular training schedules supervised by lecturers and professional trainers, as follows:

traditional dance, Monday–Thursday, 13:00–15:00 (Ruang Kaca Secretariat); percussion,

Wednesday–Friday, 15:00–17:00 (Ruang Kaca); band, Wednesday–Friday, 17:00–19:00

(Studio Secretariat); cinematography, Monday–Thursday, 16:00–18:00 (Studio Secretariat);

and choir, Tuesday–Saturday, 16:00–18:00 (SMAKA Secretariat). The accompanying

photograph shows dancers wearing traditional costumes.

Source: Universitas YARSI. (n.d.). Organisasi Kemahasiswaan – UKM Smarakaryadhawani (SMAKA). Universitas YARSI.

https://drive.google.com/file/d/1by0xkRUdrZjg7K0AQMsIR3AVbna_YbAx/view?usp=shari

https://www.yarsi.ac.id/kemahasiswaan/ormawa

https://www.youtube.com/watch?v=qC5X1Fy4SJs&t=77s

Evidence 2 — IMASI pencak silat as complementary cultural activity

Page 3 of the institutional PDF documents IMASI, a YARSI student organisation dedicated to martial-arts training, particularly pencak silat. The material shows participants in a group pose and lists Tuesday and Friday training from 17:00 to 19:00. As pencak silat is a cultural practice, this contributes contextual evidence of student cultural preservation.

Source: https://www.yarsi.ac.id/kemahasiswaan/ormawa Figure 2. IMASI Pencak Silat Student Group — cultural martial-arts activity at YARSI

Evidence 3 — NGASO meeting preparing PENTAS 2026

University news published on 22 April 2026 discusses a student performance under preparation in conjunction with YARSI's 59th anniversary. It demonstrates coordination and planned public-facing artistic activity during the reporting year. This source alone is not proof that PENTAS was delivered or how many qualifying public performances occurred.

Source: Universitas YARSI, 22 April 2026, https://www.yarsi.ac.id/ngaso-2026-ngopi-santai-perdana-bahas-pentas-mahasiswa-dies-natalis-ke-59-universitas-yarsi

Evidence 4 — Student participation in National Film Day 2026

An official university article reports student attendance at a film screening and discussion associated with National Film Day 2026. This supports broader engagement with cultural and creative expression.

Source: Universitas YARSI, 2026, https://www.yarsi.ac.id/mahasiswa-universitas-yarsi-turut-meramaikan-peringatan-hari-film-nasional-2026.htm

Documentary evidence 1 — source: Indicator 11.2.5, PDF p. 2.

Documentary evidence 2 — source: Indicator 11.2.5, PDF p. 3.

Documentary evidence 3 — source: Indicator 11.2.5, PDF p. 3.

Validation Note

The portal selects “more than 15 performances”. The accompanying evidence confirms arts organisations, rehearsal arrangements and planned events but does not substantiate a count of completed public performances during the 2026 reporting year. The selected portal category is reproduced without claiming independent verification.

11.2.6 — Projects to Record and Preserve Intangible Cultural Heritage

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	National cultural heritage (selected in portal)

Evidence Statement

Universitas YARSI supported the continuation and intergenerational participation of community religious-social traditions during Ramadan 1447 H (2026), including communal iftar and sahur, religious lectures, prayers, almsgiving and Eid activities at Masjid Jami YARSI. A 2026 university report documents student involvement across several cohorts in organising and sharing these traditions. A separate report records a gathering with institutional partners during Ramadan.

Implementation and Supporting Evidence

Evidence 1 — Ramadan 1447 H: student participation and living traditions

A university news story published 7 April 2026 documents participation by Library and Information Science students from several cohorts in the Ramadan committee of Masjid Jami YARSI. The activities included free communal meals at iftar and sahur, short lectures, tarawih prayers, i'tikaf, charity distribution and Eid observances. The account captures student roles and their experience of transmitting community practices. Source: Universitas YARSI, 7 April 2026. https://www.yarsi.ac.id/ramadhan-2026-mahasiswa-pdsi-kembali-lakukan-pengabdian-di-masjid-yarsi

Evidence 2 — Mosque Ramadan activities and community participation

An additional university article about the 2026 free-homecoming programme describes community-facing Ramadan events, including Qur'an reading education for children and beginners, shared meals for worshippers and travellers, charitable distribution and Eid prayers. The report explains that planned activities were largely carried out, except the Quran-recitation competition (MTQ).

Source: Universitas YARSI, 2026. https://www.yarsi.ac.id/madura-tujuan-akhir-mudik-yarsi-2026-terima-kasih-bank-bri-bsi-juk-e-solutions-dan-goto

Evidence 3 — Ramadan gathering with external institutional partners

The university's March 2026 coverage describes a shared iftar event with institutional partners. The gathering provides context for community and social-cultural engagement around Ramadan and the continuity of collective practices. Its contribution to intangible-heritage safeguarding would become stronger if paired with a structured record of the

Documentary evidence 1 — source: Indicator 11.2.6, PDF p. 2.

11.3 Expenditure on arts and heritage

11.3.1 — University Expenditure

Reporting year: 2026 | THE Impact Rankings: 2027

Evidence Statement

The WUR Portal SDG 11 records IDR 124,041,437,622 for the 2027 submission under 11.3.1 (university expenditure). The comparative 2026 portal figure is IDR 358,687,550,947. These figures are transcribed from the portal; no additional financial breakdown or underlying accounting evidence was attached.

Portal reporting item	Value
2027 submission	IDR 124,041,437,622
2026 comparator	IDR 358,687,550,947
Primary source	WUR Portal SDG 11, page 3

11.3.2 — University Expenditure on Arts and Heritage

Reporting year: 2026 | THE Impact Rankings: 2027

Evidence Statement

The WUR Portal SDG 11 records IDR 1,043,793,590 for the 2027 submission under 11.3.2 (university expenditure on arts and heritage). The comparative 2026 portal figure is IDR 1,043,793,590. These figures are transcribed from the portal; no additional financial breakdown or underlying accounting evidence was attached.

Portal reporting item	Value
2027 submission	IDR 1,043,793,590
2026 comparator	IDR 1,043,793,590

11.4 Sustainable practices

11.4.1 — Measurement and Targets for Sustainable Commuting

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

Universitas YARSI publicly documented active-mobility encouragement during 2026, notably a large Fun Walk linked to Jakarta Car-Free Day. This is relevant to institutional awareness of walking and low-impact mobility. However, the THE criterion specifically asks whether the university measures commuting modes and sets targets to increase sustainable commuting.

Implementation and Supporting Evidence

Evidence 1 — Fun Walk during YARSI's 59th anniversary

The university reports that more than 1,500 participants, including academic staff, students,

alumni and members of the community, took part in a Fun Walk at Jakarta Car-Free Day on

Sunday, 21 June 2026. The programme is a real 2026 example of promoting walking and

public health. Figure 1. Fun Walk Celebrating the 59th Anniversary of Universitas YARSI, 2026

Source: Universitas YARSI. (22 June 2026). YARSI's 59th Anniversary Features a Fun

Walk and Free Health Services.

https://www.yarsi.ac.id/dies-natalis-yarsi-ke-59-hadirkan-fun-walk-dan-layanan-kesehatan-

Documentary evidence 1 — source: Indicator 11.4.1, PDF p. 2.

Validation Note

The Fun Walk is evidence of encouraging active mobility, not proof of a university-wide commuting modal-share baseline, measurement process or target. These are not provided in the attached PDF.

11.4.2 — Actions to Promote Sustainable Commuting

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification

Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

Universitas YARSI documents practical support for sustainable campus mobility through pedestrian routes, a university bus used for group travel, and an institutional statement identifying bicycle parking. Its sustainable-transportation report includes photographs of bus and pedestrian facilities and cites internal student travel-survey figures: approximately 67% use private vehicles and about 50% live in nearby boarding accommodation. These figures are self-reported and lack survey methodology or a clearly identified collection year. In 2026, the University additionally promoted walking through its 59th-anniversary Fun Walk at Jakarta Car-Free Day on 21 June, attended by more than 1,500 participants.

Implementation and Supporting Evidence

Evidence 1 — University bus for shared transportation

The university-prepared transport report describes a campus bus supporting collective

journeys by students and staff for academic and non-academic activities. A photograph shows

a YARSI-branded bus, providing tangible evidence of institutional transport capacity. Figure 1. Universitas YARSI Bus

Evidence 2 — Campus pedestrian paths and walking access

The accompanying photographs document marked pedestrian crossings, paved routes adjacent

to campus buildings and landscaped walkways. These physical measures can facilitate short

journeys on foot and contribute to safer pedestrian circulation.

Evidence 3 — Fun Walk for the 59th anniversary, June 2026

Official university coverage confirms a Fun Walk held on 21 June 2026 in the Jakarta Car-

Free Day area with more than 1,500 students, staff, alumni, relatives and members of the

public. The organised activity raises awareness of walking as a healthy, inclusive option and

complements the institution’s pedestrian infrastructure.

Documentary evidence 4 — source: Indicator 11.4.2, PDF p. 3.

11.4.3 — Telecommuting, Remote Working and Condensed Working Week

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

Universitas YARSI has issued a formal Rector circular explicitly authorising Work from Home (WFH) for lecturers and educational staff during an exceptional campus-operating period. Rector Letter No. 1803/REK/PP.20/VIII/2025, dated 31 August 2025, directed teaching to be conducted online on 1 September 2025 and specified Flexible Working Arrangement (FWA) through WFH for employees, with on-site work exceptions handled by unit leadership. This is direct historical evidence that employee telecommuting was institutionally permitted and implemented as an authorised arrangement, rather than merely having the technological capacity for online work. The appended university Hybrid Class brochure independently demonstrates provision for remote teaching and digital learning, while a YARSI–BRIN online programme in May 2026 demonstrates continued use of virtual collaboration. However, the 2025 circular is event-specific and does not establish ongoing standard WFH practice in 2026 or a compressed working week.

Implementation and Supporting Evidence

Evidence 1 — Rector circular formally authorising WFH

Rector Letter No. 1803/REK/PP.20/VIII/2025, issued 31 August 2025 and signed by Prof. dr. Fasli Jalal, Ph.D., states in point 3 that lecturers and educational personnel shall work from home, with reporting arrangements for units that must continue office-based work. Point 1 also directs online classes on 1 September 2025. Its stated background is the anticipated public demonstrations and safety of the campus community. The letter proves that an institution-level remote-work arrangement was authorised.

Source: Rector Letter No. 1803/REK/PP.20/VIII/2025.

https://drive.google.com/file/d/1mSmIz5NkX_emCebUNe71PEV9kPAWYsBr/view?usp=sha

Evidence 2 — University Hybrid Class programme

The brochure advertises Hybrid Class bachelor programmes in Management, Accounting, Informatics Engineering and Library and Information Science. It explains that students can join regular classes remotely, recordings remain available, and the LAYAR learning management system supports flexible study. This demonstrates institutional remote-learning infrastructure and use of digital delivery.

Source: YARSI admissions portal: https://pmb.yarsi.ac.id/

https://drive.google.com/file/d/1XkPjgrpbhLDpaYOMGHayaN2DhdHztdnk/view?usp=sharin

g Figure 1. Universitas YARSI Hybrid Class brochure — university support for remote and flexible lectures

Evidence 3 — Online YARSI–BRIN Interlibrary Loan socialisation (2026

implementation context)

On 22 May 2026, the YARSI Library and BRIN held a Zoom information-sharing session concerning access to scientific information and interlibrary loan, involving more than 100 participants. The programme confirms that online institutional collaboration continued in the 2026 reporting period.

Source: Universitas YARSI, published 26 May 2026: https://www.yarsi.ac.id/perpustakaan-

universitas-yarsi-dan-brin-perkuat-akses-informasi-ilmiah-melalui-sosialisasi-interlibrary-

Documentary evidence 1 — source: Indicator 11.4.3, PDF p. 3.

Validation Note

The identified rector circular was issued in August 2025 for a one-day arrangement; it does not establish an enduring 2026 telecommuting policy or a condensed working week.

11.4.4 — Affordable Housing for Employees

Reporting year: 2026 | THE Impact Rankings: 2027

Evidence Statement

The 2027 WUR Portal records “No” for this indicator. The attached materials provide no separate policy, eligibility assessment, housing unit provision, or financial aid documentation demonstrating an institutional affordable-housing programme for this target group. Accordingly, the answer is reported as “No” without extrapolation from unrelated student or employee services.

Portal response	Evidence status
2027: No	No qualifying separate evidence PDF supplied
2026: No	Portal comparison column; no positive claim

11.4.5 — Affordable Housing for Students

Reporting year: 2026 | THE Impact Rankings: 2027

Evidence Statement

The 2027 WUR Portal records “No” for this indicator. The attached materials provide no separate policy, eligibility assessment, housing unit provision, or financial aid documentation demonstrating an institutional affordable-housing programme for this target group. Accordingly, the answer is reported as “No” without extrapolation from unrelated student or employee services.

Portal response	Evidence status
2027: No	No qualifying separate evidence PDF supplied
2026: No	Portal comparison column; no positive claim

11.4.6 — Prioritisation of Pedestrian Access on Campus

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

Universitas YARSI provides pedestrian access within and around its campus to facilitate the movement of students, academic staff, educational staff, and visitors. Pedestrian facilities include paved walkways alongside university buildings, marked pedestrian crossings, internal pedestrian routes surrounded by landscaped areas, and sidewalks along the university frontage. These facilities form part of the campus circulation environment and support pedestrian movement between university buildings and surrounding access areas. The university also promotes walking and healthy lifestyles through community activities, including the Fun Walk held on 21 June 2026 as part of its 59th anniversary celebrations. In addition, the university's Open House on 13 January 2026 facilitated visits by external participants to campus facilities. The availability of these pedestrian facilities is documented through the institutional photographs attached to this report. The photographs provide visual evidence of the physical infrastructure supporting pedestrian access on campus.

Implementation and Supporting Evidence

Evidence 1 — Campus pedestrian routes and crossing

The PDF provides five pages of photographic documentation of campus walking facilities.

Page 1 depicts a zebra-crossing facility near campus circulation; page 2 illustrates a building-side walkway with a raised kerb separating it from an adjacent vehicle lane. Further images show pedestrian circulation near landscaped grounds and the sidewalk along the university raised kerb.

Evidence 2 — Fun Walk during YARSI's 59th anniversary (2026 complementary

Universitas YARSI held a Fun Walk on 21 June 2026 in the Jakarta Car-Free Day area as part of its 59th anniversary celebrations. The activity promoted walking and healthy lifestyles among participants. It complements the photographic evidence of pedestrian facilities by demonstrating the university's efforts to promote walking.

Evidence 3 — External campus visits through Open House

YARSI Library reported an Open House held on 13 January 2026, which provided external participants with an opportunity to visit university facilities. This activity provides complementary evidence of visitor access to campus facilities.

11.4.7 — Cooperation with Local Authorities on Planning and Development

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

During 2026, Universitas YARSI implemented community-based environmental development in Cluster Nusantara, Banjar Wijaya, Tangerang, transforming approximately 500 m² of neglected communal land into a productive green area. Academic teams also introduced IoTbased smart irrigation and circular-economy practices. These activities demonstrate community engagement and practical neighbourhood improvements.

Implementation and Supporting Evidence

Evidence 1 — Community green-space revitalisation

YARSI reported converting a neglected neighbourhood public-amenity plot in Cluster

Nusantara, Tangerang, into a productive green space integrating herbal planting, compost,

liquid organic fertiliser and community learning. The account describes circular-economy

activities involving local environmental workers and academic collaboration. Source: Universitas YARSI, 24 September 2026

https://www.yarsi.ac.id/lewat-ekonomi-sirkular-yarsi-tempat-sampah-jadi-sumber-ekonomi

Evidence 2 — Independent media confirmation (2026)

Republika reported the approximately 500 m² communal-land revitalisation in August 2026,

corroborating the location, degraded starting condition and environmental-economic

sumber-ekonomi

Evidence 3 — Smart irrigation for a community productive garden (2026)

JPNN reported a YARSI Informatics Technology Faculty community-service project in Cipete, Tangerang, installing IoT-based irrigation in the same neighbourhood landscape. The activity contributes technical expertise and community capacity-building to local development.

Documentary evidence 1 — source: Indicator 11.4.7, PDF p. 2.

Documentary evidence 2 — source: Indicator 11.4.7, PDF p. 2.

Documentary evidence 3 — source: Indicator 11.4.7, PDF p. 3.

Validation Note

The available evidence substantiates neighbourhood redevelopment and engagement with local community actors. A formal agreement or official participation record with a local planning authority, and any connection to affordable housing, is not demonstrated in the provided PDF.

11.4.8 — Sustainable Standards for New Buildings

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

Universitas YARSI identifies Government Regulation of the Republic of Indonesia No. 16 of 2021 (PP 16/2021) as a national regulatory reference for sustainable building design and construction. The 406-page regulation includes specific Green Building (Bangunan Gedung Hijau, BGH) provisions: a definition linked to measurable resource efficiency; mandatory or recommended application by building classification; sustainable resource-use principles; requirements throughout the building lifecycle; and performance-based certification. This directly substantiates the existence of an applicable national green-building framework.

Implementation and Supporting Evidence

Evidence 1 — PP No. 16/2021: National Green Building legal and technical framework

Universitas YARSI's buildings are subject to Government Regulation No. 16 of 2021, which defines Green Buildings (Bangunan Gedung Hijau, BGH) as buildings that meet technical standards and demonstrate measurable efficiency in the use of energy, water, and other resources. Source: Republic of Indonesia, Government Regulation No. 16 of 2021, https://jdih.pkp.go.id/produk-hukum/pp-16-2021

Evidence 2 — Historical YARSI reporting reference to PP 16/2021

Earlier university THE reporting referenced the national building regulatory framework. This

demonstrates previous recognition of the standard in institutional reporting.

The PDF supplies textual source references but no extractable photographic evidence.

Validation Note

PP No. 16/2021 is evidence of a national regulatory framework; it is not, by itself, project-level verification or certification that a new YARSI building meets the standards.

11.4.9 — Brownfield-Site Reuse for New University Buildings

Reporting year: 2026 | THE Impact Rankings: 2027

WUR Portal 2027 Response

Recorded response	Selected category / qualification
Yes	Yes selected in the WUR portal; see evidence assessment below

Evidence Statement

Universitas YARSI has historical institutional documentation of the redevelopment of previously used land within the campus area. The site of the former Faculty of Medicine building was reused for the construction of the YARSI University Integrated Building, which was completed in 2022. The photographs provided show the original YARSI building and the university building as it stands today.

Implementation and Supporting Evidence

Evidence 1 — Reuse of an existing campus building site

Universitas YARSI redeveloped a previously used campus building site. The former Faculty of Medicine building was demolished because it was no longer suitable for supporting teaching and laboratory activities. In 2022, Universitas YARSI constructed the Integrated Building on the same site as part of its campus land reuse efforts. The university also reported reusing existing foundations and recycled building materials while retaining the surrounding green spaces and drainage systems. This initiative reflects an effort to reuse previously developed land (*brownfield redevelopment*) while optimising the use of available land without expanding the campus area.

Evidence 2 — Community regeneration of neglected land

On 24 September 2026, YARSI reported the transformation of a neglected communal area in Cluster Nusantara, Tangerang, into a productive green learning space. This shows a contemporary institutional commitment to rehabilitating previously disturbed land.

Source: Universitas YARSI, 24 September 2026. https://www.yarsi.ac.id/lewat-ekonomi-sirkular-yarsi-tempat-sampah-jadi-sumber-ekonomi

Evidence 3 — Independent reporting of community land reuse

Republika ESG Now reported redevelopment of an approximately 500 m² former dumping area in Tangerang. This independent coverage supports the scope and existence of the environmental restoration activity.

Source: Republika ESG Now, 19 August 2026.

https://esgnow.republika.co.id/berita/tk0rru416/yarsi-sulap-lahan-bekas-tempat-sampah-jadi-sumber-ekonomi

Documentary evidence 1 — source: Indicator 11.4.9, PDF p. 2.

Universitas YARSI

Documentary evidence 2 — source: Indicator 11.4.9, PDF p. 2.

Validation Note

The 2022 campus redevelopment is historical evidence; documentary proof of site identity, foundation reuse and recycled material use is not included beyond the institutional narrative and photographs.

Evidence Reconciliation and Quality-Control Notes

This report consolidates all thirteen supplied indicator evidence PDFs, the WUR Portal SDG 11 and the SDG 1 reference report (fifteen source files in total). The portal response for every indicator 11.2.1–11.2.6, 11.3.1–11.3.2 and 11.4.1–11.4.9 has been mapped. The SDG 1 file is used exclusively as the visual/structural reference, not as evidence for SDG 11.

Check	Finding
Financial values	Matched to the 2027 and 2026 columns of WUR Portal SDG 11, page 3.
Indicator 11.2.5	Portal selects >15 performances; evidence does not independently establish annual number.

Indicators 11.4.4 and 11.4.5	Portal explicitly records No; no positive evidence was supplied.
Historical items	Older documentary examples, including 2022 construction and 2025 work arrangement, are distinguished from 2026 delivery.
Documentation	Extractable embedded photographs from supplied reports included alongside the applicable indicators.
Scope	All 17 portal indicator entries covered in numerical order.

Source inventory: WUR Portal SDG 11.pdf; revSDG 1 - YARSI THE 2027.pdf; THE UY 2027 - SDG 11.2.1.pdf through 11.2.6.pdf; THE UY 2027 - SDG 11.4.1.pdf, 11.4.2.pdf, 11.4.3.pdf, and 11.4.6.pdf through 11.4.9.pdf.
